

**Addendum:** Array-based technology and recommendations for utilization in medical genetics practice for detection of chromosomal abnormalities

Melanie Manning, MD and Louanne Hudgins, MD for the American College of Medical Genetics and Genomics (ACMG) Professional Practice and Guidelines Committee

*Genetics in Medicine* (2020) 22:2126; <https://doi.org/10.1038/s41436-020-0848-8>

Addendum to: *Genetics in Medicine* 12:742–745 (2010) <https://doi.org/10.1097/GIM.0b013e3181f8baad>, published online 18 October 2010.

This document was reaffirmed by the ACMG Board of Directors as of 27 April 2020 with the following addendum:

We suggest the following considerations in reaffirming this document:

1. Since this document no longer meets the criteria for an evidence-based practice guideline by the College, it has been reclassified as a Clinical Practice Resource.
2. Technical information for array-based testing may be referenced at the ACMG Standards and Guidelines for constitutional cytogenomic microarray analysis, including postnatal and prenatal applications: revision 2013.<sup>1</sup>
