ON THE COVER

Autumn

Mei Leitsch

“Autumn” is one the first pieces I completed and is a part of a polyptych of four paintings inspired by the Midwest seasons. The polyptych is meant to embody the beauty of the Midwest and my own experience hiking in Minnesota, Wisconsin, South Dakota and Iowa. SYSTEMATIC REVIEW

- 1** Models of communication for polygenic scores and associated psychosocial and behavioral effects on recipients: A systematic review
Courtney K. Wallingford, Hannah Kovilpillai, Chris Jacobs, Erin Turbitt, Clare A. Primiero, Mary-Anne Young, Deanna G. Brockman, H. Peter Soyer, Aideen M. McInerney-Leo and Tatiane Yanes

INVITED COMMENTARY

- 12** Moving toward more consistency in variant classification and clinical action
Karen L. David and Joshua L. Deignan

ARTICLES

- 16** Informing variant assessment using structured evidence from prior classifications (PS1, PM5, and PVS1 sequence variant interpretation criteria)
Vineel Bhat, Ivan A. Adzhubei, James D. Fife, Matthew Lebo and Christopher A. Cassa
- 27** Evaluating brain white matter hyperintensity, IQ scores, and plasma neurofilament light chain concentration in early-treated patients with infantile-onset Pompe disease
Yu-Kang Hsu, Yin-Hsiu Chien, Steven Shinn-Fong Peng, Wuh-Liang Hwu, Wang-Tso Lee, Ni-Chung Lee, Eric Po-Yu Huang and Wen-Chin Weng
- 37** Biallelic variants in *PIGN* cause Fryns syndrome, multiple congenital anomalies-hypotonia-seizures syndrome, and neurologic phenotypes: A genotype–phenotype correlation study
Lucy Loong, Agostina Tardivo, Alexej Knaus, Mona Hashim, Alistair T. Pagnamenta, Kerstin Alt, Helena Böhner-Rabel, Alfonso Caro-Llopis, Trevor Cole, Felix Distelmaier, Patrick Edery, Carlos R. Ferreira, Aleksandra Jezela-Stanek, Bronwyn Kerr, Gerhard Kluger, Peter M. Krawitz, Marius Kuhn, Johannes R. MISSION STATEMENT

Genetics in Medicine is a monthly journal committed to the timely publication of:

- Original reports which enhance the knowledge and practice of medical genetics
- Strategies and innovative approaches to the education of medical providers at all levels in the realm of genetics

As an official journal of the American College of Medical Genetics and Genomics (ACMG), the journal will:

- Provide a forum for discussion, debate and innovation concerning the changing and expanding role of medical genetics within the broader context of medicine
- Fulfill our responsibility to the College membership through the publication of guidelines, policy statements and other information that enhances the practice and understanding of medical genetics

Finally, as genetics becomes increasingly important in the wider medical arena, we will be an accessible and authoritative resource for the dissemination of medical genetic knowledge to providers outside of the genetics community through appropriate reviews, discussions, recommendations and guidelines.
