### ON THE COVER

#### Figurehead afloat off 90 Mile Beach 2014

Rodney Forbes

From my 2014 exhibition 'The Lost White Woman of Gippsland', this painting looks at the trumped-up settlement-era myth of a white woman in captivity with the Gunai-Kurnai tribe of Southern Australia. The story was used as a pretext for punitive massacres of the Aboriginals. This figurehead was a key part of the story, as the Gunai-Kurnai surrendered a ship's figurehead that was in their possession, in an attempt to placate their white accusers. Courtesy of the artist and Glenn Green Galleries, Santa Fe.

Fathy, Michelle A. Baum, Shirlee Shril, Shrikant Mane, Seth L. Alper and Friedhelm Hildebrandt
- 100357** Hospital-level variation in genetic testing in children's hospitals' neonatal intensive care units from 2016 to 2021  
Katharine Press Callahan, Joshua Radack, Monica H. Wojcik, Sabrina Malone Jenkins, Russell T. Nye, Cara Skraban, Katherine Taylor Wild and Chris Feudtner

## MISSION STATEMENT

*Genetics in Medicine* is a monthly journal committed to the timely publication of:

- Original reports which enhance the knowledge and practice of medical genetics
- Strategies and innovative approaches to the education of medical providers at all levels in the realm of genetics

As an official journal of the American College of Medical Genetics and Genomics (ACMG), the journal will:

- Provide a forum for discussion, debate and innovation concerning the changing and expanding role of medical genetics within the broader context of medicine
- Fulfill our responsibility to the College membership through the publication of guidelines, policy statements and other information that enhances the practice and understanding of medical genetics

Finally, as genetics becomes increasingly important in the wider medical arena, we will be an accessible and authoritative resource for the dissemination of medical genetic knowledge to providers outside of the genetics community through appropriate reviews, discussions, recommendations and guidelines.
